LogNet FTP Delivery Upgrade

The LogNet website is planning an upgrade to the data delivery area, where your ordered data is staged for download.

Our new environment (FTGA.ihs.com) will provide enhanced security via SFTP and is targeted for implementation by July 31, 2019.

LogNet Customers:

- > If you currently retrieve your files using the MyFiles menu (Image 1) or MyFiles link (Image 2), you will not see any changes in functionality.
- > Multiple File Download(MFD) functionality using MyFiles with the MFD plugin for Chrome or Firefox browsers will not be affected.

If you currently retrieve your LogNet files using FTP, you will be affected.

Please contact us at DL-GIT-NA-Lognet_FTGA@ihsmarkit.com for further instructions.
