LogNet Subscription Search – The New Interface

Special Note to EnerDeq Customers:

Since the majority of EnerDeq customers are also LogNet subscription customers, EnerDeq requests will be redirected to this new LogNet Subscription Search page.

Note to All Customers:

- > **APIs:** In LogNet, APIs are in 12-digit format. Only the first 12 digits will be considered (1).
 - > **API Limit:** Only the first 500 APIs will be considered for search and orders. You can save the current list to a text file using “**Export APIs**” button (2).
 - > **Search Area and Data Type:** Limited to your entire subscription area and digital or raster logs. You can search for digital logs (LAS) or rasters (TIFF) or both (3). You can view your current subscriptions using the “**View My Subscription**” button (4).
 - > **Additional Data Type:** If you require additional data type (i.e. Directional Survey, Pressure data), you will need to use the old interface (transactional). Please save the API list first (2) then go to LogNet home page using the IHS Navigation icon (5).
 - > **Deliverable:** Due to the high volume of downloadable data, LogNet will deliver the individual files to the delivery folder, not in ZIP format (ZIP has a limit of 2 GB). It is recommended that you use the LogNet FTGA account and a FTP tool (i.e. FileZilla) to download the files. Please contact us at DL-GIT-NA-Lognet_FTGA@ihsmarkit.com for account setup or any other questions.
 - > **Page Size:** You can set the items per page to 10, 100, or All (6).
 - > **Place Order:** Will send the currently selected items to the final order page (7).
 - > **Export Records:** Will send the currently selected items to an Excel document (8).
-

The screenshot shows the LogNet Subscription Search interface. At the top left is the LogNet logo (5). The user is identified as John Smith from IHS ENERGY. The navigation bar includes DATABANK SEARCH, WELL ALERTS, RESOURCE CENTER, and SUPPORT. The main heading is "Lognet Subscription Content Search" with a "What's New" link.

Search Criteria

API/UWI List: 300410000200 (1)

Type: Digital Raster Both (3)

Search Area: Limit to My Subscription [View My Subscription](#) (4)

Important:

- LogNet APIs are 12 digit format.
- API Limit: Only the first 500 APIs will be considered for search.
- Search Area: Limited to your subscription area.
- Current API List can be saved by "Export APIs" button below.
